

Caring for your Linen Rental

Linens from Special Occasions are ready for use right out of the bag. Please take the time to follow a few easy guidelines to make sure linens are well cared for and extra charges are avoided:

- Remove all excess debris and food from the linen before returning them to the bag.
- Do not place linens back into the plastic, please put them directly into the linen bag or moisture can be trapped.
- Allow any wet linen to dry before putting in the linen bag, trapped moisture can develop mildew stains.

Any stains or damage above normal table use may incur additional cleaning or replacement charges. This includes but is not limited to:

- Rips or tears of any kind.
- Cigarette marks or burns.
- Excessive food grease or wax.
- Inks or coloured dyes that may stain the cloth
- Mildew from trapped moisture.

Regular food and wine stains will normally come out of our linens with our laundering systems. By following our few simple guidelines, your linen rental should be smooth and hassle-free
